40% UMAXX® + 35% Ammonium Sulphate

Professional turf fertilizer  
Premium Grade (SGN 200)

## Product Features

- 40% of the nitrogen is from UMAXX® stabilized nitrogen. UMAXX contains two inhibitors that reduce nitrogen loss to ammonia volatilization and nitrate leaching.
- 35% of the nitrogen is in a quick-release form from ammonium sulphate.
- Phosphorus free.

## Turf Benefits

- According to research, at least 30 percent of the nitrogen from urea can be lost to the atmosphere through volatilization within days of application.
- Urease inhibitor in combination with the nitrification inhibitor in UMAXX urea significantly increases nitrogen absorption by turfgrass to provide uniform growth, deep root mass and consistent colour intensity over 12 to 16 weeks.
- UMAXX performs consistently regardless of soil temperature or weather.
- Ammonium sulphate is particularly useful for rapid recovery and green-up of greens, tees and fairways.
- Ammonium sulphate is an acidifying fertilizer that is useful on high pH soils.
