

SPRING PERFORMANCE

A high performance foliar program to enhance turf color, improve rooting, and increase carbohydrates. Helps turf repair from winter damage and prepare for summer stress.

If Old Man Winter did this to your turf...

EnP can get your turf back to this!

Begin program at first mowing. For maximum recovery, repeat application every 7 to 14 days. As with all foliar applications, best results are achieved when turf is not subjected to frost conditions.

<i>Product</i>	<i>Benefits</i>	<i>Rate / 1000 sq ft</i>
ZetaxPlex™ N-Fuze 7-0-0	Cool Weather Nitrogen Response	6 oz
Energy	Increases Photosynthesis and Carbohydrate Storage	6 oz
