

SUMMER STRESS

Seaweed-Based Program

SUMMER FOLIAR FERTILITY PROGRAM

Provides turf with balanced nutrition, plant extracts, and L-amino acids. This program will help enhance stress tolerance, improve photosynthesis, provide better rooting, and increase overall nutrient uptake.

<i>Product</i>	<i>Benefits</i>	<i>Rate / 1000 sq ft</i>
N-Liven 15	Foliar nitrogen and biostimulant package that helps the plant build anti-oxidants. Sea Plant extracts and humic acids are known to enhance root growth – critical during summer stress periods.	8 oz
Zeta \times Plex™ Grow 40	Concentrated L-amino acid supplement designed to increase protein production and improves carbohydrate storage. Helps plant build anti-stress compounds crucial for stress survival.	1 oz
Foliar Relief	High K formulation with phosphite to improve plant performance during hot summer conditions. Improves plant water relations and increases plant anti-oxidant production.	6 oz
