Streaker Red Top

## OSC BENTGRASS SEED MIXTURES

### L-93

Dense, aggressive, and dollar spot resistant. Ideally suited for use on greens, tees, and fairways. Adapts well to a wide range of mowing heights.

### COATED L-93

Dense, aggressive, and dollar spot resistant. Ideally suited for use on greens, tees, and fairways. Adapts well to a wide range of mowing heights. Coated for enhanced moisture absorption.

### T-1

Remarkable genetic color-consistently ranked #1 in NTEP trials. Interseeds into existing turf to transform it into a luxurious putting surface. Aggressive, makes visible gains on Poa Annua each year, heals ball marks and divots quickly.

### V-8

Dollar Spot resistance. V8 has one of the finest leaf textures of any creeping bentgrass. Greens up in the spring earlier than Penncross. V8 is a medium-dark green color-darker than Penncross and lighter than T-1. Color persists well into the autumn with better than average frost tolerance.

### PENNWAY MIX

Pennway provides the broad genetic diversity required to create an excellent playing surface on various soil types. Contains Penncross, PennLinks II, Seaside II, Penneagle, and Penn G-6. Has good heat and drought tolerance with good disease resistance.

### PENNCROSS

With a medium green color and rapid establishment, it is known for its aggressive, lateral growth habit and wide range of adaptability. Penncross is excellent for greens, tees, and fairways.

### COATED PENNCROSS

With a medium green color and rapid establishment, it is known for its aggressive, lateral growth habit and wide range of adaptability. Penncross is excellent for greens, tees, and fairways. Coated for enhanced moisture absorption.

### PENNTRIO MIX

Combining the strengths of Penncross, Penneagle II, and PennLinks II, PennTrio is an excellent choice for tees and fairways. This certified blend has a wide range of climatic adaptability due to its genetic diversity.

### PENN A-4

Proven to be able to compete successfully against Poa-annua, Penn A-4 features a striking dark green color and fine leaf texture that produce a beautiful, smooth and grainless putting surface. Adaptable to a wide range of conditions, it recovers quickly and prefers to be kept on the dry and lean side, thereby reducing maintenance costs.

### PURE DISTINCTION

The ultimate bentgrass for smooth and true putting greens. Pure Distinction boasts a rich heritage that includes the legendary Penn A's and G's. Pure Distinction features dense, upright and aggressive growth with an exceptional ability to compete against Poa-annua.

### PENN A-1 / A-4 MIX

Combines the strengths of two proven bentgrass varieties to create a blend with broad genetic diversity that will produce the highest quality putting surface. Extremely durable and featuring a fine leaf texture and aggressive growth habit, Penn A-1/A-4 excels in a variety of climates and conditions. It prefers to be kept on the dry and lean side, thereby reducing management costs.

### PENN LINKS II

Building on the strengths of the original, PennLinks II is an excellent choice for greens, tees and fairways. Its distinguished, medium dark green coloration and semifine leaf texture create a beautiful surface with excellent playability.
