Characteristics: Get an extra edge on disease with L-93 XD creeping bentgrass (*Agrostis stolonifera*). L-93 XD was developed and selected under high disease pressure to create a bentgrass with improved tolerance and excellent turf quality. L-93 XD is tough and beautiful with fine leaf texture and great color.

Adaptation: L-93 XD is best suited to greens and is adaptable to tees, approaches and fairways. It thrives across the cool, temperate regions of the world and is adapted well into the transition zone between warm- and cool-season areas.

Recommended Seeding Rate:

New Seeding: 1-2 lbs. per 1000 ft² (5-10 g/m²)
Interseeding: 2-4 lbs. per 1000 ft² (10-20 g/m²)

NTEP Highlights: You can view L-93 XD’s performance in the 2014 bentgrass green and fairway tests in the National Turfgrass Evaluation Program (NTEP). Some 2016 highlights include:

- ◆ **Quality**—#1 California Golf Club of San Francisco greens test, tied #2 Los Angeles Country Club greens test, #1 NJ1 greens, tied #2 IN1 greens, tied #2 LPI Group 3 greens, tied #2 LPI Group 1 fairway, tied #3 LPI group 2 fairway
- ◆ **Dollar Spot**—Tied # 2 greens test, #2 fairway test
- ◆ **Leaf Texture**—#1 fairway test
- ◆ **Density**—#3 spring density greens, #2 fall density greens, #2 fall density fairways
