

RESCUE

BRAND

Hard Fescue

Good Disease and Pest Resistance

- ✓ Inherently drought tolerant
- ✓ Desirable shade tolerance
- ✓ Fine leaf texture and good genetic color

Rescue brand hard fescue (*Festuca brevipila*) is recommended for use on home lawns, parks and golf course roughs.

It is an exceptional choice for low maintenance areas and can be left unmown for its ornamental qualities.

Good Turf Quality: **Rescue** brand has good leaf texture and genetic color with the ability to retain good turf quality in shade. **Rescue** brand makes a great option for those shaded areas where other grasses fade out.

Broad Adaptation: **Rescue** brand hard fescue performs well in shade, but also thrives in full sun. The combination of an extensive root system and ability to establish quickly make this turfgrass an excellent choice for stabilizing slopes and preventing erosion.

Drought and Heat Tolerance: Hard fescues are known for their good drought tolerance and ability to persist in high heat where other fine fescues species will fade out. **Rescue** brand is even adapted into the northern transition zone, but also thrives in northern climates or at high elevations.

Recommended Seeding Rates:

- Maintained at turf heights: 4-6 lb/1,000 ft² (20-30 g/m²)
- Unmown areas: 20-40 lb/acre (25-45 kgs/ha)
- Overseeding into existing turf: 6-10 lb/1,000 ft² (30-50 g/m²)
