### Use the right technologies

Using the the right technologies will optimize plant health and provide consistent playing surfaces throughout the growing season. The proper technologies will prevent insufficient or excessive turf growth and allow for the best value for the money spent. Nutrite fertilizers are formulated with premium ingredients and designed specifically to meet the needs of Turf Managers. Each of our proven and exclusive technologies will provide reliable growth response and predictable results that meet your expectations.

Suståne<sup>®</sup> is made from aerobically composted turkey litter. Research has shown that Suståne<sup>®</sup> stimulates soil microbial activity which is beneficial for turfgrass. Suståne<sup>®</sup> provides predictable, slow release organic nitrogen and is an excellent addition to any turf nutrition program.

Nutryon<sup>®</sup> polymer-coated urea provides a long-lasting, precise and consistent feeding. Four types of Nutryon<sup>®</sup> are available with release longevities lasting up to 25 weeks. Nutryon<sup>®</sup> feeds gradually for stronger and healthier turf.

Nutryon-S<sup>®</sup> slow release nitrogen provides turf nutrition that lasts up to 8 weeks. Nutryon-S<sup>®</sup> uses unique technology that supplies consistent feeding for better turf quality over an extended period.

N-Fusion<sup>™</sup> homogeneous fertilizer provides uniform coverage and exceptional turf response. N-Fusion<sup>™</sup> rapidly dissolving granules technology minimizes mower pick-up with a light irrigation. The highly visible white granules allow for ease of application and ensures maximum results.

UMAXX<sup>®</sup> is a premium stabilized nitrogen fertilizer designed to maximize nitrogen efficiency and minimize nitrogen loss. Stabilized Nitrogen remains in the root zone longer in a usable form, therefore, providing consistent growth and optimum results. When it comes to performance and return on investment no other urea-based product compares to UMAXX<sup>®</sup> Stabilized Nitrogen. UMAXX<sup>®</sup> provides consistent colour response for up to 12 to 16 weeks.

Methy dure

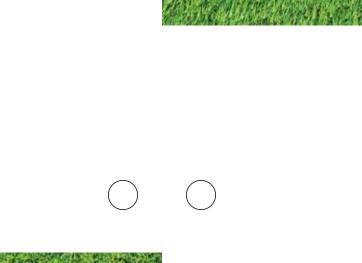

Methydure<sup>®</sup> methylene urea slow release nitrogen is a trusted technology that has a gradual, consistent release. Methydure<sup>®</sup> allows for the effective feeding of turfgrass with fewer applications for up to 12 to 16 weeks with a decreased risk of nitrate leaching or runoff.

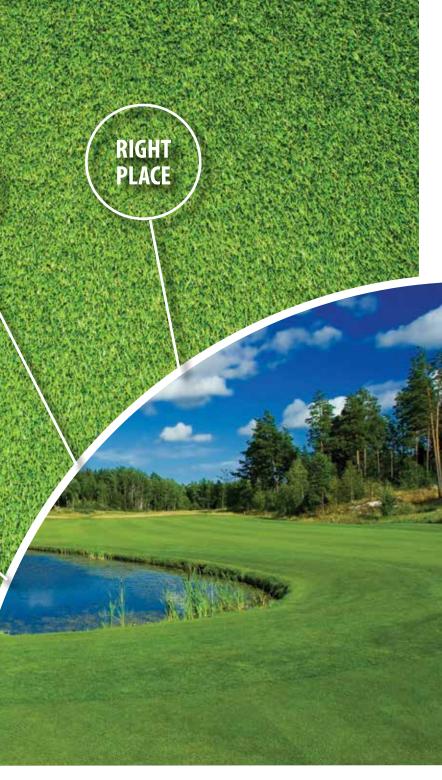

# fms

Contains up to five sources of nitrogen with different release rates: Fast, Medium and Slow.The slow-release nitrogen materials release over an extended (up to 12 - 16 weeks) period without promoting excessive leaf growth. These sources do not stimulate shoot growth to the extent that root growth is negatively affected. The gradual nitrogen release enhances the recuperative potential of turfgrass.

### Isodure

Isodure<sup>™</sup> is a premium quality slow release nitrogen source. It delivers high levels of efficient, available water insoluble nitrogen (WIN). Benefits include reduced nitrogen loss, reduced thatch build-up and a reduction in surge growth all season long. Isodure<sup>™</sup> nutrient release is in line with nutrient demand and turfgrass growth.

#### **MICRO GRANULAR GREENS GRADE**

Micro grade for

iform application

on greens

10-1-4

fertilizer for

greens and tees

Organic base granular

10-1-4 Sustane micro grade fertilizer

is particularly useful for early spring

applications on greens and tees to

accelerate green-up. This unique fertilizer

contains 75% guick release nitrogen

from ammonium sulphate and 25% slow-

release organic nitrogen from Sustane <sup>®</sup>

turkey litter compost, thereby ensuring a continuous nitrogen release with

increased soil microbial activity.

Product Code	Fertilizer Analysis	Slow Release / Stabilized Nitrogen	K-Source	Description	Units / pallet Bag Size
C110903	<b>18-2-18</b> with HydroFuze® Complete	97% Methydure®	SOP	1:1 N to K balanced nutrient ratio with slow release nitrogen from Methydure <sup>®</sup> . HydroFuze <sup>®</sup> Complete allows an even and homogeneous distribution of boron, iron, manganese and zinc, enhancing their availability. Contains 6.1% S and homogeneous micronutrients.	50 / 20 kg
C110056	<b>17-0-20</b> N-Fusion™ Homogeneous	65% Methydure®	SOP	Premium homogeneous white fertilizer with rapidly dissolving granules technology and slow release nitrogen from Methydure. Contains 2.5% Ca, 7% S.	50 / 20 kg
C17017	<b>17-0-17</b> N-Fusion™ / Isodure™ Homogeneous	50% Methydure® / 25% Isodure™	SOP	Homogeneous fertilizer with rapidly dissolving granules technology and slow release nitrogen from Isodure and Methydure. Contains 4% Ca, 2.5% Mg, 5.5% S, 1% Fe.	50 / 22.68 kg
C1620850LB	<b>16-20-8</b> N-Fusion™ / Starter Homogeneous	40% Methydure®	SOP	Homogeneous fertilizer with rapidly dissolving granules technology. Phosphorous promotes vigourous seedling and root development. Contains 1% Ca, 2.8% S, 2% Fe, 0.5% Mn, 0.5% Zn.	50 / 22.68 kg
C16212ISO50LB	<b>16-2-12</b> N-Fusion <sup>™</sup> / UMAXX® Homogeneous	65% UMAXX® / 25% Isodure™	SOP	Homogeneous fertilizer with rapidly dissolving granules technology. Formulated with UMAXX stabilized nitrogen and slow release nitrogen from Isodure to maximize nitrogen efficiency. Contains 2% Ca, 1% Mg, 4% S, 0.5% Mn.	50 / 22.68 kg
C110294	<b>13-3-12</b> N-Fusion™ Booster Homogeneous	100% Ammonium Sulphate	SOP	Good spring & fall product. Ammonium sulphate enhances spring green-up and is useful on high pH soils. Premium homogeneous white fertilizer. Contains 21% S, 3% Fe, 0.25% Mn.	50 / 20 kg
10-2-10-F22	<b>10-2-10</b> Suståne®	80% SR	SOP	Homogeneous organic based fertilizer from Suståne®. Formulated with ammonium sulphate for quick green-up. Contains 1% Ca, 2% Fe.	40 / 22.68 kg
1014SUST	<b>10-1-4</b> Suståne <sup>®</sup> - Booster	75% Ammonium Sulphate / 25% SR	SOP	Homogeneous organic based fertilizer from Suståne <sup>®</sup> . Formulated with 75% ammonium sulphate for quick green-up and is useful on high pH soils. Contains 2% Ca, 10% S.	40 / 22.68 kg
5-2-10-F20	<b>5-2-10</b> Suståne®	70% SR	SOP	Homogeneous organic based fertilizer with Suståne® composted turkey litter and sulphate of potash. Contains 2% Ca, 2% Fe.	50 / 20 kg
5-2-4-F22	<b>5-2-4</b> Suståne®	70% SR	SOP	Homogeneous organic based fertilizer with Suståne® composted turkey litter. Contains 3% Ca, 2% Fe.	40 / 22.68 kg

#### Get optimal and consistent coverage

When the time comes to choose the right granular product for your greens and tees, the N-Fusion<sup>™</sup> homogeneous product line is designed to provide uniform, consistent coverage and optimal nutrient application. Whether it is a spring fertilization requiring a quick response, a starter fertilizer or a product with a high percentage of slow-release nitrogen for prolonged fertilization, N-Fusion<sup>™</sup> covers all your needs and those of the plant regardless of the time of year. Furthermore, the highly visible white granules allow for ease of application.

## True performer in a wide variety of conditions

Isodure

Isodure<sup>™</sup> is a unique, slow release nitrogen source that delivers more water insoluble nitrogen WIN (89%) than any other slow-release nitrogen source. Isodure<sup>™</sup> releases nitrogen through dissolution and hydrolysis and is independent of microbial activity and soil temperature making it a clear choice for turf managers seeking a nitrogen source available in a wide temperature range. With a salt index of 5, Isodure<sup>™</sup> is safer to apply than most non-coated nitrogen sources. Benefits include reduced nitrogen loss, less thatch build-up and limited surge growth all season long.

#### **RIGHT PRODUCT**

Match fertilizer technology to plant needs and the area being fertilized

Nutrite products are developed with proven technologies to meet the specific needs of the turf and to ensure exceptional performance in the field. When choosing the Right Product the particle sizing is equally important as the product components. It is important to correctly match the particle size to the turf area being fertilized to ensure the best possible distribution of nutrients. Turf maintained at lower mowing heights will benefit from the greater number of granules applied and reduced mower pick-up compared with larger SGN product. All Nutrite products go through a rigorous quality control process to guarantee the greatest possible uniformity. Products are offered in four different SGN sizes to make selecting the Right Product effortless.

#### **MINI GRANULAR TEE & FAIRWAY GRADE**

Product Code	Fertilizer Analysis	Slow Release / Stabilized Nitrogen	K-Source	Description	Units / pallet Bag Size
F246757	30-0-6	90% FMS Extended	SOP	FMS EXTENDED – Slow release nitrogen from Methydure® and Nutryon®. Formulated with extended release Nutryon® polymer- coated urea. Provides gradual and continuous nutrition up to 16 weeks. Contains 2.1% S, 1% Fe, Micros.	40 / 25 kg
F247009	25-0-10	75% UMAXX®	SOP	Formulated with UMAXX <sup>®</sup> stabilized nitrogen to maximize nitrogen efficiency. Improved formulation with more magnesium. Contains 3% Mg, 3.5% S, 1% Fe.	40 / 25 kg
F247016	23-6-12	50% FMS™	SOP	FMS <sup>™</sup> Fast, Medium, Slow – Slow release nitrogen from Methydure <sup>®</sup> and Nutryon <sup>®</sup> . Provides gradual and continuous nutrition over 12 weeks. Contains 4.2% S, 1% Fe, Micros.	40 / 25 kg
F247534	<b>21-7-14</b> N-Booster	100% Quick Release Nitrogen	SOP	Homogeneous fertilizer formulated with 100% quick release nitrogen (53% Ammoniacal Nitrogen and 47% Nitrate Nitrogen) for rapid green-up during spring time. Contains 5.1% S	40 / 25 kg
F247527	<b>21-6-12</b> with HydroFuze <sup>®</sup> Complete	75% FMS™	SOP	FMS <sup>™</sup> Fast, Medium, Slow – Slow release nitrogen from Methydure <sup>®</sup> , Nutryon <sup>®</sup> and Nutryon-S. Provides gradual and continuous nutrition over 12 weeks. HydroFuze <sup>®</sup> Complete allows an even and homoge- neous distribution of boron, iron, manganese, zinc, enhancing their availability. Contains 4.9% S and homogeneous micronutrients.	40 / 25 kg
F247023	20-0-12	75% FMS™	SOP	FMS <sup>™</sup> Fast, Medium, Slow – Slow release nitrogen from Methydure®, Nutryon® and Nutryon-S. Provides gradual and continuous nutrition over 12 weeks. Contains 4.8% S, 2% Fe, Micros.	40 / 25 kg
F247030	19-3-19	80% UMAXX®	SOP	Formulated with UMAXX <sup>®</sup> stabilized nitrogen to maximize nitrogen efficiency. High rate of potassium for improved stress tolerance. Improved formulation with more magnesium. Contains 3% Mg, 6.6% S, 1% Fe.	40 / 25 kg
F245091	<b>15-3-9</b> UMAXX <sup>®</sup> & Suståne <sup>®</sup> Homogeneous	50% UMAXX® / 50% Suståne®	SOP	Homogeneous fertilizer with UMAXX <sup>®</sup> stabilized nitrogen techno- logy and Suståne natural fertilizer. Contains 1.5% Ca, 0.5% Mg, 2% Fe.	40 / 25 kg
F245084	<b>15-0-20</b> Nutri-Booster	40% Potassium Nitrate	SOP/NOP	Potassium nitrate enhances spring green-up. High rate of potas- sium for improved stress tolerance. Contains 3% Ca, 1.5% Mg, 2% Fe.	40 / 25 kg
F245070	<b>12-30-8</b> Nutri-Starter with AVAIL	20% Potassium Nitrate	SOP	Phosphorous promotes vigourous seedling and root development. AVAIL increases phosphorous availability. Contains 3,5% Ca, 2% Mg	40 / 25 kg
F245189	<b>5-0-41</b> Nutri-K	100% Methydure®	SOP	Use when potash is deficient or as a fall fertilizer. Contains 1% Mg, 14% S.	40 / 25 kg

#### **Mini-Sized Blend:** When size does matter!

At the same applied rate, fertilizers of a smaller size will contain many more particles than one of a larger size. Mini-sized particle provides excellent distribution at lower application rates. Using fertilizers of smaller sizes will increase the uniformity of nutrient distribution which results in more even colour, smoother turf playing surfaces and healthier turf. Designed for use on tees and closely mowed fairways. Try our mini-sized blends for optimum performance and healthy turf to see the difference!

**Mini size Fertilizer** applied at 2 kg /100 m<sup>2</sup>

Premium size Fertilizer applied at 2 kg /100 m<sup>2</sup>

#### **Uniformity Index:** Valuable Information!

The uniformity index (UI) of a granular fertilizer is defined as the ratio between larger and smaller granules of a specific blend multiplied by 100. A UI of 100 denotes that all blended particles are the same size. A higher UI denotes better quality fertilizer blends which result in more even distribution of nutrients on the golf course or sports field. Nutrite sets the industry standard with a UI between 50 and 60. To maximize your productivity, do the math and choose Nutrite's high uniformity index fertilizers.

istribution of micronutrients

#### 21-6-12 Mini grade fertilzer for greens and tees with HydroFuze<sup>®</sup>

SGN

145

21-6-12 mini grade fertilizer delivers gradual and continuous nitrogen release for up to 12 weeks. This product provides balanced nutrition that increases the potential for turf recovery without causing excessive leaf growth. Each granule is impregnated with HydroFuze <sup>®</sup> Complete to ensure uniform and homogeneous distribution of boron, iron, manganese and zinc on tees and fairways.

#### **RIGHT** RATE

Apply the proper rate of fertilizer for your specific plant needs and field conditions

At Nutrite, we work with you to produce the highest quality turf and playing surfaces. Our full-service soil analysis lab, detailed technical sheets and personalized agronomic support allow us to recommend the proper rate and application method for each of our products.

R525336	15-0-30	50% Nutryon®	SOP / MOP	Use when potash is deficient or as a fall fertilizer. Contains 5.3% S.	40 / 25 kg

#### Formulated for optimal results

The FMS<sup>™</sup> technology contains up to five sources of nitrogen with different release rates: Fast, Medium and Slow. The slow-release nitrogen materials release over an extended (up to 12 -16 weeks) period without promoting excessive leaf growth. These sources do not stimulate shoot growth to the extent that root growth is negatively affected. The gradual nitrogen release enhances the recuperative potential of turfgrass. Additionally, an extended release version is available that utilizes longer releasing polymer-coated ureas.

#### To maximize nitrogen efficiency

UMAXX® is a premium stabilized nitrogen fertilizer designed to maximize nitrogen efficiency and minimize nitrogen loss. Stabilized Nitrogen remains in the root zone longer in a usable form, therefore, providing consistent growth and optimum results. When it comes to performance and return on investment, no other urea-based product compares to UMAXX<sup>®</sup> Stabilized Nitrogen. UMAXX<sup>®</sup> provides a consistent colour response for up to 12 to 16 weeks.

#### **REGULAR GRANULAR PROFESSIONAL GRADE**

R537005	16-2-8	50% UXAXX / 25% Suståne®	SOP / MOP	Formulated with UMAXX <sup>®</sup> stabilized nitrogen and Suståne <sup>®</sup> composted turkey litter. Contains 1.2% S.	40 / 25 kg

#### **RIGHT** TIME

Apply fertilizer when nutrients are necessary to optimize plant health

Timing fertilizer applications to optimize plant health can be a challenge. Your Nutrite turf specialist will recommend an annual fertility program using slow release and other granular or soluble fertilizers that are suited to your conditions while considering an approach of lighter, more frequent applications. The Nutrite technologies; FMS<sup>™</sup> (Fast-Medium-Slow), UMAXX<sup>®</sup> ,Methydure®, Isodure™ and Nutryon® slow release nitrogen sources allow for programs to be created that will feed at the Right Time and in tune with the needs of the turf.

#### HYDROGRO® PRODUCTS

Product Code	Fertilizer Analysis	Description	Units / pallet Bag Size
L120259	Xsodis™	Xsodis <sup>™</sup> is a unique liquid calcium and magnesium concentrate amendment that improves stress resistance. Contains 15% Ca, 2% Mg, 0.3% B.	2 X 2.5 gal
L120252	Fighter-25™	Fighter-25 <sup>™</sup> is a new generation of liquid fertilizer. It contains a highly available source of nitrogen and potash (8-0-15) in combination with phosphite and salicylic acid, two plant elicitors that improve plant defense systems. It also contains a full range of L-Amino acids to promote plant health during summer stress. Contains 25% phosphite a non-ionic surfactant.	2 X 2.5 gal
L120245	EKLO-Plus™	EKLO-Plus <sup>™</sup> is a foliar amendment created to maximize colour, plant health, micronutrient uptake and availability during periods of stress. Contains a high percentage of kelp extract from Ecklonia maxima and a non-ionic surfactant for optimal efficiency and superior results. Contains 5% N, 0.8% Mg, 2.5% S, 2.4% Fe, 0.6% Mn + Micros.	2 X 2.5 gal
S062240	Mikropak™	Concentrated micronutrient package for fairway application. Contains 3.9% Mg, 4.7% S, 7.6% chelated Fe, 3.9% Mn, 2% Zn.	25 lb
S062233	GetGreen®	Unique micronutrient package with nitrogen from ammonium sulphate and chelated iron for greens. Contains 2% Mg, 16% S, 4% chelated Fe, 2% Mn, 1% Zn.	5 lb

#### GETGREEN

GETGREEN® 10-0-0 is a unique fully liquefiable (99.98%) crystalline micronutrient designed for prevention and remedy of chlorotic conditions. The homogenous composition of nitrogen, chelated iron, magnesium, manganese, zinc and sulfur provides quick uptake, prolonged residual verdure and stress relief for plants and turf. This product is fully "tank mixable" with registered fungicides, herbicides, growth regulators, surfactants and most known flowable fertilizers.

## SODIS

Xsodis<sup>™</sup> 3-0-0 with 15% Ca is a complexed liquid calcium and magnesium gluconate product. It is designed to help manage stress conditions and remediate sodium salt accumulations in plants, turf and soil. The patented technology provides a rapid and prolonged carbohydrate & calcium feed to the shoot and root systems. Monthly application to high traffic areas in times of stress will provide optimum results.

### **MIKROPAK**

MIKROPAK<sup>™</sup> is a unique fully liquefiable (99.98%) crystalline micronutrient package. The concentrated homogenous composition of chelated iron, magnesium, manganese, zinc and sulfur provides quick uptake and prolonged residual verdure and stress relief for plants and turf.

### HydroGro

**Sprayable Amendments** for enhanced colour and improved stress tolerance

## Get a uniform and homogeneous distribution of nutrients.

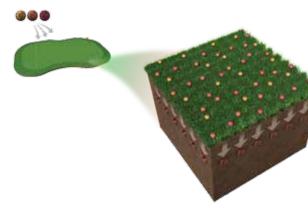

## Hydro Fuze

The HydroFuze<sup>®</sup> process impregnates select macro and micronutrients onto every granule of a fertilizer blend. This allows for an even and homogeneous distribution of the micronutrient wherever the fertilizer is applied. This revolutionary nutrient-coating process, based on HydroGro's micron technology, provides an ultra-small nutrient molecule, enhancing the availability and uptake of calcium, magnesium, iron, manganese and zinc to optimize plant health. HydroGro's HydroFuze® technology greatly improves flexibility and efficiency of your granular fertilizer application.

#### HydroFuze® Fertilizer Application

HydroFuze<sup>®</sup> impregnates micronutrients onto EVERY granule in a fertilizer blend. HydroFuze<sup>®</sup> distributes nutrients evenly over the entire area allowing for better and more precise turfgrass response.

**Apply Nutrite fertilizer** products in an environmentally responsible manner where it is available to the plant

environmental stewards, Nutrite As is constantly researching the latest technological innovations to provide you with application recommendations and products that are environmentally responsible. Nutrite designs products to maximize absorption by the plant while minimizing losses due to leaching or volatilization. This is accomplished by utilizing technologies including Methydure<sup>®</sup>, Isodure<sup>™</sup>, Nutryon<sup>®</sup> and UMAXX<sup>®</sup> which release nitrogen based on soil conditions. Nutri-Spray<sup>™</sup> sprayable fertilizer products allow for more precise applications of nutrients.

### NUTRI-SPRAY<sup>TM</sup> FERTILIZERS

Product Code	Fertilizer Analysis	Slow Release / Stabilized Nitrogen	K-Source	Description	Units / pallet Bag Size
S060245	<b>29-7-15</b> Soluturf	-	PN (NP)	Quick release nitrogen. Provides rapid green-up in early spring. Contains 0.25% chelated Fe. Now formulated with a non-ionic surfactant.	42 / 15 kg
S060238	<b>28-4-16</b> Fairway	70% UMAXX®	PN / SOP (NP)	Excellent for Fairways. UMAXX <sup>®</sup> maximizes nitrogen efficiency and turf colour. Fully chelated micronutrients. Contains 0.4% Fe, Micros. Now formulated with a non-ionic surfactant.	42 / 15 kg
S060217	<b>22-9-19</b> UMAXX <sup>®</sup> + Phosphite & Pekacid	75% UMAXX®	PN (NP)	UMAXX <sup>®</sup> maximizes nitrogen efficiency and turf colour. Phosphite stimu- lates the natural defence mechanisms of turf. Acidic nature of PeKacid enhances nutrient uptake. Fully chelated micronutrients. Contains 5% phosphite, 0.6% Mg, 0.75% Fe, Micros. Now formulated with a non-ionic surfactant.	42 / 15 kg
S061722	<b>22-6-19</b> UMAXX® + Phosphite & Pekacid	75% UMAXX®	PN (NP)	UMAXX® maximizes nitrogen efficiency and turf colour. Phosphite stimu- lates the natural defence mechanisms of turf. Acidic nature of PeKacid enhances nutrient uptake. Fully chelated micronutrients. Contains 10% phosphite, 0.5% Mg, 0.75% Fe, Micros. Now formulated with a non-ionic surfactant.	42 / 15 kg
S062842	<b>22-0-22</b> UMAXX®	65% UMAXX®	PN / SOP	Balanced spoon-feeding with UMAXX <sup>®</sup> to maximize nitrogen efficiency and turf colour. Fully chelated micronutrients. Contains 0.5% Mg, 6.4% S, 0.5% Fe, Micros. Now formulated with a non-ionic surfactant.	42 / 15 kg
S060378	<b>17-3-8</b> ACID+ with PekAcid	100% Ammonium sulfate	PN (NP)	Ammonium sulphate enhances spring green-up and is useful on high pH soils. Acidic nature of PeKacid enhances nutrient uptake. Fully chelated micronutrients. Contains 17.7% S, 0.5% Mg, 0.5% Fe, 0.2% Mn, Micros. Now formulated with a non-ionic surfactant.	42 / 15 kg

#### 8-10-10 Perennial & Annual Flower Food

Balanced and organic based formula for perennials and annuals. Contains 25% slow release nitrogen and micronutrients for extended feeding and colourful blooms.

#### 4-10-0 Granular Bone Meal

Derived from natural sources and enriched with calcium, this formula ensures healthy growth and good root development when transplanting plants and bulbs.

#### **ORNAMENTAL FERTILIZERS**

Product Code	Fertilizer Analysis	Description	Units / pallet Bag Size
S060182	20-20-20	All purpose water soluble fertilizer. Contains fully chelated micronutrients.	42 / 15 kg
S060091	15-30-15	Proven formula for all flowering plants. Complete formulation with fully chelated micronutrients.	42 / 15 kg
R530866	<b>14-14-14</b> Nutryon® (3-4 months)	Nutryon <sup>®</sup> polymer-coated urea, controlled release fertilizer. Sprinkle for season-long feeding. Ideal for hanging basket, container plant and top dress application.	40 / 25 kg
R533309	14-7-14	Tree and evergreen food.	50 / 10 kg
R538230	8-10-10	Perennial and annual flower food.	50 / 10 kg
R526141	5-4-3 O'Natural with Iron	Economical natural product. Laying hen compost with 2% Fe, 8% Ca and 0.5% Mg.	40 / 22.68 kg
R533281	4-10-0	Granular bone meal.	50 / 10 kg

#### 14-7-14 Tree & Evergreen Food

Balanced and organic based formula with micronutrients for optimum growth of trees, shrubs and evergreens. Contains 50% slow release nitrogen for extended feeding.

NUTRI-SPRAY

Sprayable fertilizers for more precise application of nutrients

Formulated using proven, innovative and reliable fertilizer technologies, the complete Nutri-Spray<sup>™</sup> line of fertilizers compliment any fertilizer program to make feeding with liquid applications less labour-intensive and more economical. Choose the new generation of Nutrite Nutri-Spray<sup>™</sup> water soluble fertilizers with balanced nutrients, highly-efficient nitrogen sources, fertilizer additives like PeKacid and potassium phosphite and fully chelated micronutrient packages. Nutri-Spray<sup>™</sup> now includes a very effective, non-ionic surfactant that improves coverage, retention over the leaf surface and foliar absorption of nutrients.

Nutri-Spray<sup>™</sup> water soluble fertilizers provide the best cost-per-unit of nutrient of any sprayable fertilizer. Applying nutrients in a sprayed solution provides the most uniform distribution of nutrients, which is especially important when correcting deficiencies or applying nutrients at lower rates. Produced to mix easily and remain stable in solution, Nutri-Spray<sup>™</sup> products are flowable in the bag, dissolve easily and require minimal mixing.
